NEWS RELEASE

Building websites just got easy for everyone on the planet!

Sheffield UK based, software Development company, DutyCrew Ltd, have today launched it's revolutionary new web page manufacturing system.

The software enables users to build independent standalone websites with incredible ease, consistency and flexibility.

DutyCrew's Biz King says, "*We believe that this patented software is the fastest tool available with which to make or prototype websites. It is fast, flexible, portable and can be exported to different machines and operating systems with incredible ease*".

He continues "*Our licensing model also breaks the mould, by combining flexibility and fairness with a choice of either subscription to, or ownership of, the software, whilst remaining under the user's control via our online account management system*".

Available now for Mac OS X Tiger (10.4)
Windows and Linux variants in development.

Purchase Priced at £26 (Single User version)
Subscription Priced at £2/month (Single User version)

People wanting further information about the software can contact the company on:

07738 929856 (Biz King – Technical biz@dutycrew.com)
